Education:

Bachelor's in Software Engineering (2022-2026)
PMAS Arid Agriculture University, Rawalpindi

Professional Experience:

Frontend Developer - Kaizen Global (Nov 2025 – May 2026)

- Engineered immersive, tech-centric Web3 interfaces using React.js, focusing on high-performance cinematic designs and seamless user experiences.
- Architected multi-chain integrations across EVM, Solana, Bitcoin, and TON, enabling secure wallet connectivity and real-time blockchain data synchronization.

Frontend Developer Intern – Alfabolt Nust, Isb (Jun 2025 - Aug 2025)

- Developed scalable React/Next.js applications using modern architecture and custom hooks for efficiency.
- Delivered a full-stack Blog ecosystem featuring secure authentication, CRUD, and real-time analytics.

Frontend Developer Intern - Dassoft (March 2025-Jun 2025)

- Designed and developed responsive user interfaces using React and Tailwind CSS.
- Collaborated in a hybrid environment on real-time web development projects.

Projects:

- **TON Staking Protocol:** Built a DeFi platform for stake/unstake s using TON Connect; optimized state for real-time reward tracking.
- **MediSense (AI Analyst):** Developed an OCR/LLM pipeline to simplify medical reports; designed a cinematic dashboard for data visualization.
- **Launch-X Vesting:** Engineered a token claim system with dynamic vesting curves and Solana chain wallet integration.

Professional Certifications: (By Coursera)

React.js
Google AI Essentials
Project Management
Google SEO

Skills:

Languages	Frontend	Blockchain	Tools
HTML, CSS, JS	React.js	Web3, dApps	GitHub, Supabase
